Android App Development
Fundamentals of Javascript
CS50's Web Programming with
python and javascript
React-Django Integration

Apurva Singh

Freelancer right now looking for some internship opportunities.
Delhi

Summary

Creating web applications gives me the utmost joy, it gives me a sense of achievement. The ability to code, which innovates the user interface to optimum gives me satisfaction, I believe that I am a perfectionist and this can be seen in my code. I love programming because it is infinite and constantly changing. It has more potential for innovation, experimentation and discovery.

I am compelled to create smoother softwares as nobody, including me, likes slow and outdated technology. I hope that the improvements I make can improve the world.

My approach is simple: I think to make something great, one should think about how they would like it to be? Personal touch is important. Because isn't homemade always better than fast fare? Join me, and let's build a better modern web!

Specializations:

- HTML5/CSS3/Sass
- JavaScript
- Django
- React.js

Experience

Vir Shahid Om Fuel Center

Web Developer

April 2020 - June 2020 (3 months)
